On the Prospects of Production Sharing Agreements for the Arctic Oil and Gas Fields Development

Keywords: foreign investments; offshore; production sharing agreement.

page 16-20

Abstract: The development of the Arctic offshore oil and gas fields is one of the most important targets for the Russian economy. This goal requires significant capital investments as well as major technical development. The most efficient way of the projects development can be ensured by creation of the consortium between Russian national oil and gas companies and international corporations. These consortiums could develop the project based on the production sharing agreements.

Peoples' Friendship University of Russia, Moscow

University-Based Foreign Language Training Audit as a Tool to Improve the Institutional Landscape and Graduates' Competitiveness on the Labor Market

Keywords: language auditing; graduate's foreign language communicative competence; university-based foreign language training; quality.

page 55-59

Abstract: The paper provides an overview of international publications and projects that reflect the process of development and formation of language auditing as a contemporary research trend that focuses on the foreign language learning and teaching efficiency, assessment and evaluation of education model quality and language skills for specific purposes to meet the student's needs, employer's requirements and corporate culture standards. Taking into account the above overview findings the term "Lingvodidactic audit" is introduced for possible use within the framework of Russian higher education modernization challenges and tasks regarding alumni competence in foreign language and mediation regarding various professional settings.

A.A. Bulavkin

Krasnodar University MIA Russia, Krasnodar

Socio-Cultural Foundations of Professional Training in Higher Education Institutions of the Ministry of Internal Affairs of Russia

Keywords: educational institution of the Ministry of internal Affairs of Russia; general cultural competence; legal culture; vocational training; socio-cultural foundations; state educational standard of higher professional education.

page 60-63

Abstract: The paper substantiates the necessity of understanding socio-cultural aspects of professional development in universities of the Ministry of internal Affairs of Russia; the peculiarities of law enforcement activities within the framework of moral and legal norms and principles of subject-subject interaction are analyzed; the link between the core competencies and legal culture of the employee of law enforcement bodies is revealed.

D.A. Petrenko, V.V. Shanko

Stavropol Affiliate of Krasnodar University of MIA Russia, Stavropol

Health Saving in Professional Activity of Instructors and Teachers Involved in Professional and Physical Training of Police Officers

Keywords: health saving activities; health-caring competence; instructor and teachers;

page 64-67

teaching staff training for health-saving activities; physical training of enforcement officers; stages of health-saving activities design.

Annotation: In the paper, the problems of optimization of physical training of enforcement officers through the design of health-saving activities by professional and physical training staff. The importance of health-caring competence in the structure of professional activity of instructors and teachers and the directions of their training for health-saving activities has been stressed; the stages of design of the given activity were defined.

Engineering

D.M. Ziborov

The Plekhanov Russian Economic University, Moscow

Improving Mobile Catering Facilities

Keywords: mobile catering; food kettles; coolant; propylene glycol; catering.

Annotation: The paper discusses the possibility of using pure propylene glycol, as well as its water solutions as universal fluids used for indirect heating of the walls of the working chambers of thermal devices, and as a coolant for the heating systems in mobile catering. The relevance and novelty of this paper is explained by the fact that casing catering machines use water instead of intermediate two-phase heat transfer fluids based on propylene glycol, which can greatly reduce the pressure in the casing.

page 68-71

Mathematical Methods and Models

The Analysis of the Provisions of Law of Romano-German Legal Family and the Russian Legal System

Keywords: reception; Romano-German legal family; Russian legal system; legislation; historical stages.

Annotation: For the Russian legal system throughout its historical development the reception of the Romano-German law has been one of the ways of modernization of legal institutes. This conclusion is based on identification and consideration of the chronological periods of legal borrowing from the Romano-German system of law.

page 76-79

Political Science

A.A. Alaudinov

Chechen State Pedagogical Institute, Grozny

Regional Identity: Conceptual Approaches to Research

Keywords: political actors; regional identity; concept of identity; Russia.

Annotation: The paper deals with the basic conceptual approaches to the study of regional identity. The result of the study suggests the existence of a number of conceptual problems that arise in the course of consideration of regional identity.

page 80-86

N.A. Medushevsky, M.A. Gordeeva

Russian State University for the Humanities, Moscow

Ethnic Tolerance in Theoretical and Practical Aspects

Keywords: ethnic tolerance; identity; inclusion; civil rights.

Annotation: The question of ethnic groups' self-determination has been relevant at all times.

This fact is connected with the absence of typical solutions. Attempts of resolving ethnic disputes by a single decision have led to armed conflicts and casualties. Today, despite the spread of democratic practices, ethnic selfdetermination of individual groups meets a lot of obstacles to overcome, and the root of the problem lies primarily in the development of negotiating practices and compromise thinking.

page 87-90
